  - Total per Capita Cost (TPCC)
- Calculated based on administrative claims
- Feedback for MIPS Year 1
- No action required by MIPS EC’s
Medicare Spending per Beneficiary (MSPB)

• Determines what Medicare pays for services performed by a MIPS EC during an episode: the period immediately before, during, and after a patient’s hospital stay.

• Includes all Medicare Part A and Part B claims during the episode:
  • 3 days before a hospital admission (the “index admission” for the episode) through 30 days after hospital discharge.

• MSPB measure is assigned to individual clinicians but can be reported as a group.
Total per Capita Cost (TPCC)

• Measure of all Medicare Part A and Part B costs during the MIPS performance period

• Beneficiaries are assigned to a single Medicare TIN-NPI in a two-step process that considers
  • The level of primary care services they received (as measured by Medicare allowed charges during the performance period).
  • The clinician specialties that performed these services

• Only beneficiaries who received a primary care service during the performance period are assigned to the TIN-NPI
Improvement Activity Performance Category

- New activities added; 112 activities available now
- Requirements for small practices and non-patient facing MIPS ECs remain the same
Advancing Care Information Performance Category

• A 10% bonus is available if only use 2015 Edition CEHRT

  • Groups of ≤15 MIPS EC’s
  • Hospital-based MIPS EC’s

  • Ambulatory Surgical Center-based EC’s
Advancing Care Information

Complex Patient Bonus

• MIPS EC’s can earn up to 5 bonus points for treatment of complex patients
• Combination of Hierarchical Condition Categories (HCCs) and # of dually eligible patients treated
  • Average HCC risk score

Advanced Alternative Payment Model

- Extends the 8% generally applicable revenue based nominal amount standard that allows APMs to qualify as Advanced APM through performance year 2020
- Changes the requirement for Medical Home Models so that the minimum required amount of total financial risk increases more slowly
- Easier for clinicians to qualify for incentive payments by participating in Advanced APMs that begin or end in the middle of a year.
- All-Payer Combination Option available in 2019
MIPS APM Track

- Total composite score weight
  - Quality: 50%
  - Improvement Activities: 20%
  - Advancing Care Information: 30%
  - Cost: 0%

- Medicare Shared Savings Program Track 1 is still an APM
